

*Oregon Inlet Artificial Reef Committee  
needs your help to build*

# **A GREAT NEW NEAR-SHORE SPOT TO FISH.**

*As a non-profit, tax exempt, 501(c)7 organization, we are working with the Artificial Reef Coordinator for the North Carolina Division of Marine Fisheries to construct a **new artificial reef for recreational fishing**. It is planned to be 8 miles south of Oregon Inlet within 3 miles of the beach in North Carolina waters.*

*We are planning to build the reef by having a large retired vessel and surplus, large diameter, reinforced concrete pipe sunk in place with funds from the North Carolina Coastal Recreational Fishing License Grants Program. The grant process doesn't provide funds for a number of months, so **we could use your donation now** to help cover current operating expenses.*

*To donate, visit our website. You can donate on-line or by mail.*

*Thanks for helping to keep this worthwhile local fish habitat project moving forward!*
